

# BSK BRHR Commercial Heat Recovery Range

**Commercial range of heat recovery units used to reduce the energy required to heat or cool the buildings**

**Works by recovering the residual heat from the exhaust air and transferring it to supply air by the means of a heat exchanger**

**BSK BRHR Plus unit use high thermal efficiency heat exchangers which recover up to 90% of this heat**

**This heat recovery unit works to significantly improve both the energy efficiency and the air quality**

**BSK Plus Commercial Heat Recovery units are available with a preheater, post heater or a water heater**
