

Quiet-Vent PVC Rectangular Attenuator Silencer Range

An Attenuation silencer works the same as a silencer of a car and reduces turbulence in the ducting making the system quieter

PVC rectangular silencers for use in rectangular ducting systems to prevent noise ingress, available in sizes: 204x60mm x 0.5m, 204x60mm x 1m, 220x90mm x 0.5m & 220 x 90mm x 1m

Constructed of an outer PVC tube and an inner lining of acoustic foam

The Hi-Flow (H) model provides superior acoustic properties with less resistance

Manufactured in the UK
