

Quiet-Vent Rectangular 204x60mm Fire Collar Range

The Fire Collar range is a popular solution to prevent the spread of fire by plastic ductwork through concrete walls and floors when you cannot concrete in a sleeve

Intumescent Fire Collars prevent the spread of fire, smoke and hot gases through plastic pipes which penetrate fire compartment walls and floors

They contain intumescent material which reacts under the influence of heat to exert pressure on the pipe as it softens to form a carbonaceous char which provides an effective insulation plug thus preventing smoke and fire passing through to the adjoining compartment
