

## Quiet-Vent Round Fire Sleeve Range

The round fire sleeve range is designed to be built into the wall and sealed with intumescent mastic, available for 75, 100 & 125mm ducting sizes

The Fire Sleeve range is the most popular solution to prevent the spread of fire by plastic ductwork through concrete and plasterboard walls and floors

Intumescent Fire Collars prevent the spread of fire, smoke and hot gases through plastic pipes which penetrate fire compartment walls and floors

They contain intumescent material which reacts under the influence of heat to exert pressure on the pipe as it softens to form a carbonaceous char which provides an effective insulation plug
