QVCONSF

Quiet-Vent 75mm Straight Connector

Technical Specification

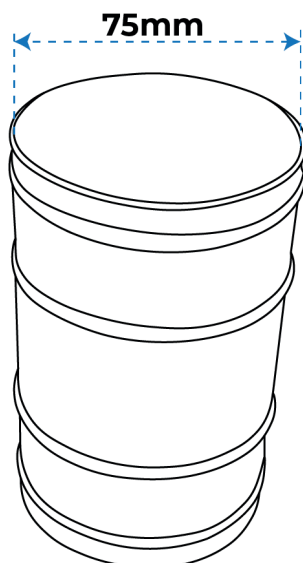

Manufacturer	Quiet-Vent
Part Number	QVCONSF
Type	Connector
Connection	2 x 75mm
Application	Ducting

Product Overview

The Quiet-Vent 75mm Straight Connector is designed to provide a secure and reliable connection between two sections of 75mm radial ducting within MVHR and mechanical ventilation systems. It allows duct runs to be extended or joined in a straight line, helping to support smooth airflow and consistent system performance across residential and light commercial ventilation layouts.

Its straight-through design provides a simple and practical solution for connecting duct sections while minimising airflow resistance. Built from durable materials for long-term use, the connector is suitable for new installations, system extensions, and ductwork adjustments where a neat and secure connection is required. For best results, ensure the ducting is properly seated and sealed to help maintain airtightness throughout the ventilation system.
